Question 1

Correct

Mark 1.00 out of 1.00

An attribute in a relation is a foreign key if the _____ key from one relation is used as an attribute in that relation.

- A. Candidate
- B. Primary ✔
- C. Super
- D. Sub

The correct answer is:
Primary

Question 2

Correct

Mark 1.00 out of 1.00

Which of the following statements is not correct?

- A. The primary key must be unique for a given table
- B. Specifying a zero (0) for the lower bound for the association multiplicity on a class diagram indicates that the item is required ✔
- C. Specifying a one (1) for the lower bound for the association multiplicity on a class diagram indicates that the item is required
- D. Most databases allow multiple records that are identical

The correct answer is:
Specifying a zero (0) for the lower bound for the association multiplicity on a class diagram indicates that the item is required

Question 3

Correct

Mark 1.00 out of 1.00

The primary key is selected from the:

- A. composite keys
- B. determinants
- C. foreign keys
- D. candidate keys ✔

The correct answer is:
candidate keys

Question 4

Correct

Mark 1.00 out of 1.00

A ____ is a property of the entire relation, rather than of the individual tuples in which each tuple is unique.

- A. Rows
- B. Key ✔
- C. Attribute
- D. Fields

The correct answer is:
Key

Question 5

Correct

Mark 1.00 out of 1.00

The relation with the attribute which is the primary key is referenced in another relation. The relation which has the attribute as a primary key is called _____

- A. Referential relation
- B. Referencing relation ✔
- C. Referenced relation
- D. Referred relation

The correct answer is:
Referencing relation

Question 6

Correct

Mark 1.00 out of 1.00

In a relational database a referential integrity constraint can be specified with the help of _____

- A. primary key
- B. foreign key ✔
- C. secondary key
- D. none of the above

The correct answer is:
foreign key

Question 7

Correct

Mark 1.00 out of 1.00

A super key is a set of one or more attributes that, taken collectively, allow us

- A. to identify uniquely an entity in the entity set ✔
- B. to make the key most powerful for faster retrieval
- C. to increase effectiveness of database access
- D. none of the above

The correct answer is:
to identify uniquely an entity in the entity set

Question 8

Correct

Mark 1.00 out of 1.00

A _____ integrity constraint requires that the values appearing in specified attributes of any tuple in the referencing relation also appear in specified attributes of at least one tuple in the referenced relation.

- A. Referential ✔
- B. Referencing
- C. Specific
- D. Primary

The correct answer is:
Referential

Question 9

Correct

Mark 1.00 out of 1.00

Which one of the following is a set of one or more attributes taken collectively to uniquely identify a record?

- A. Candidate key
- B. Sub key
- C. Super key ✔
- D. Foreign key

The correct answer is:
Super key

Question 10

Correct

Mark 1.00 out of 1.00

Which of the following is not a Key in SQL ?

- A. Primary
- B. Foreign
- C. Alternate
- D. Secondary ✔

The correct answer is:
Secondary

Question 11

Correct

Mark 1.00 out of 1.00

What is true about Unique and primary key?

- A. Unique can have multiple NULL values but Primary can't have. ✔
- B. Unique can have single NULL value but Primary can't have even single.
- C. Both can have duplicate values
- D. None of the Mentioned

The correct answer is:
Unique can have multiple NULL values but Primary can't have.

Question 12

Correct

Mark 1.00 out of 1.00

A Key which is a set of one or more columns that can identify a record uniquely is called?

A. Natural key

B. ✔ Candidate key

C. Not Null key

D. Alternate key

The correct answer is:

Candidate key

Question 13

Correct

Mark 1.00 out of 1.00

Which key accepts multiple NULL values?

A. Foreign Key

B. Unique Key ✔

C. Primary Key

D. None of the Mentioned

The correct answers are:
Foreign Key,

Unique Key

Question 14

Correct

Mark 1.00 out of 1.00

A Foreign key is combined with a foreign key creates

- A. Parent child relationship between the tables that connect them ✔
- B. Many-Many relationship between the tables that connect them
- C. Network model between the tables that connect them
- D. None of the Mentioned

The correct answer is:
Parent child relationship between the tables that connect them

Question 15

Correct

Mark 1.00 out of 1.00

Referential integrity dictates that:

- A. the value of a primary key must appear in a foreign key of the related table.
- B. the value of a foreign key must appear in a primary key of the related table ✔
- C. the value of a primary key cannot appear in a foreign key of the related table.
- D. the value of a foreign key cannot appear in a primary key of the related table.

The correct answer is:
the value of a foreign key must appear in a primary key of the related table
