Question 1

Correct

Mark 1.00 out of 1.00

What is a subquery?

- a. A subquery is a select-from-where expression that is nested within another query ✔
- b. A subquery is any query that is nested within another query
- c. A subquery is a relation that is externally specified which can be used to handle data in queries
- d. A subquery is a condition that excludes all the invalid tuples from the database

The correct answer is:
A subquery is a select-from-where expression that is nested within another query

Question 2

Correct

Mark 1.00 out of 1.00

What will be the advantage of using Nested query?

- a. They allow a structured way of querying the database
- b. Subqueries provide different ways to perform complex operations
- c. Both 1 and 2 statements are correct ✔
- d. None of these

The correct answer is:
Both 1 and 2 statements are correct

Question 3

Correct

Mark 1.00 out of 1.00

The _____ connective tests for set membership, where the set is a collection of values produced by a select clause. The _____ connective tests for the absence of set membership.

a. Or,in

b. Not in,in

c. In,not in ✔

d. In,or

The correct answer is:
In,not in

Question 4

Correct

Mark 1.00 out of 1.00

What will be the query for the following question.

Find all the tuples having temperature greater than 'Paris' from 'weather'table.

a. SELECT * FROM weather WHERE temperature > (SELECT temperature FROM weather WHERE city = 'Paris'); ✔

b. SELECT * FROM weather WHERE temperature > (SELECT * FROM weather WHERE city = 'Paris')

c. SELECT * FROM weather WHERE temperature > 'Paris' temperature;

d. None of the mentioned

The correct answer is:
SELECT * FROM weather WHERE temperature > (SELECT temperature FROM weather WHERE city = 'Paris');

Question 5

Correct

Mark 1.00 out of 1.00

What will be the query for the following question.

Find the names of the countries whose city condition is sunny from location table.

a. SELECT country FROM location WHERE condition = 'sunny';

b. SELECT country FROM location WHERE city IN (SELECT city FROM weather WHERE condition = 'sunny'); ✔

c. SELECT country FROM location WHERE city NOT IN (SELECT city FROM weather WHERE condition = 'sunny');

d. None of the mentioned

The correct answer is:
SELECT country FROM location WHERE city IN (SELECT city FROM weather WHERE condition = 'sunny');

Question 6

Correct

Mark 1.00 out of 1.00

If a set is a collection of values given by the select clause, The _____ connective tests for set membership

a. within

b. include

c. equals

d. in ✔

The correct answer is:
in

Question 7

Correct

Mark 1.00 out of 1.00

What is a correlated sub-query?

a. An independent query that uses the correlation name of another independent query. ✔

b. A sub-query that uses the correlation name of an outer query.

c. A sub-query that substitutes the names of the outer query

d. A sub-query that does not depend on its outer query's correlation names

The correct answer is:
An independent query that uses the correlation name of another independent query.

Question 8

Correct

Mark 1.00 out of 1.00

The _____ construct returns true if the argument in the sub-query is void of duplicates

a. not null

b. not unique

c. unique ✔

d. null

The correct answer is:
unique

Question 9

Correct

Mark 1.00 out of 1.00

SQL subqueries that can occur wherever a value is permitted provided the subquery gives only one tuple with a single attribute are called _____

a. Exact Subqueries

b. Vector Subqueries

c. Positive Subqueries

d. Scalar Subqueries ✔

The correct answer is:
Scalar Subqueries

Question 10

Correct

Mark 1.00 out of 1.00

Nested Subqueries cannot be used for comparing two different sets?

Select one:

True

False ✔

The correct answer is 'False'.
